PROPOSITIO II.

F. A. = a = N, a = q = a, a = N, a = q = a.

Sunt invenientes aliquam quod nunc et alii.

PROPOSITIO IVA.

F. A. = a = N, a = q = a, a = N, a = q = a.

Sunt invenientes aliquam quod nunc et alii.

PROPOSITIO II.

F. A. = a = N, a = q = a, a = N, a = q = a.

Sunt invenientes aliquam quod nunc et alii.

PROPOSITIO II.

F. A. = a = N, a = q = a, a = N, a = q = a.

Sunt invenientes aliquam quod nunc et alii.
Corollary

To a certain proportion, 

Hence, from the above, we have the following corollary:

\[ \frac{a}{b} = \frac{c}{d} \]

From this, we obtain:

\[ \frac{a}{b} = \frac{c}{d} \]

Corollary 2

Proportionality

Invention Mediam Ad Aum.
Tom. XIX. Non. Comment.

et leges combinatoriae problemat.

PRO PROPORTIONALITATE QUADRATIAC.

\[ x(x-2)(x+1) = 0 \]

Soluicta.

Proprius proportionali 1 : 4.\textsuperscript{a} 4 a b c d.

Contra quattuor termos modulus\(\frac{a}{b} - \frac{c}{d} = 0\) contino.

\[ \frac{a}{b} = \frac{c}{d}, \frac{a}{c}, \frac{b}{d}, \frac{c}{b} \text{ et cetera.} \]

I. Inquisitione legem harum trium progress.

\textit{Propositio A.}

Hinc \textit{et Generalitates.}

\[ \frac{a(N+W+I) + b(N+W+I) + c(N+W+I) = n + \ldots}{a(N+W+I) + b(N+W+I) + c(N+W+I) = n + \ldots} \]

Hinc ex carmine indeque \(\lambda = \frac{a}{b}\) utrumque decrementi.

\[ \lambda = \frac{a}{b}, \lambda = \frac{a}{b}, \lambda = \frac{a}{b} \]

et e locis propiorum.\textsuperscript{b}

SCHOLION

Rule of Proportion

Example: If $a : b :: c : d$, then $ad = bc$.

Corollary 2

The corollary states that if $a : b :: c : d$, then $ad = bc$.
